American Sign Language 1a: Introduction

Required Materials

- Computer with:
 - Internet access
 - Word processing program
 - Slideshow creation program
- Cell phone, tablet, or computer camera with sound and video recording abilities
- A person, large stuffed animal, or chair
- 2 people (family, friend, classmate) to use in videos and lead a discussion with
- A photo (or even a drawing) of your family
- A hat—silly, crazy, or ordinary is fine
- Blank Paper
- Drawing tools (pencils, markers, etc.)

Note: Sign order should not be the focus of this course. While students should make an effort to put things into ASL sign order when appropriate, grading should not be based on this. Please also be aware that while you may learn particular signs one way, it's possible others may learn the same signs in a slightly different manner. As in any language, there are many variances between signs and signers, as well as regional and cultural differences. Signs may also be shortened or simplified for the ease of conversation.

COURSE CODE: EDL134

American Sign Language 1b: Learning to Sign

- 2 people (family, friend, classmate) to use in videos and lead a discussion with
- A photo (or even a drawing) of your family
- A hat—silly, crazy, or ordinary is fine
- Blank Paper
- Drawing tools (pencils, markers, etc.)

Note: Sign order should not be the focus of this course. While students should make an effort to put things into ASL sign order when appropriate, grading should not be based on this. Please also be aware that while you may learn particular signs one way, it's possible others may learn the same signs in a slightly different manner. As in any language, there are many variances between signs and signers, as well as regional and cultural differences. Signs may also be shortened or simplified for the ease of conversation.

COURSE CODE: EDL106

American Sign Language 2a: Communicating

Required Materials

- A camera (cell phone, table, or computer camera is fine)
- Photo of family or friends

Note: It is strongly recommended that schools create a venue in which ASL 2a students can interact with each other and practice their newly acquired skills.

COURSE CODE: EDL135

American Sign Language 2b: Advancing Communication Skills

Required Materials

- A camera (cell phone, tablet, or computer camera is fine)
- Computer or tablet to play video
- Screen-capture software to record conversation or camera with ability to record conversation
- Simple video editing software

Note: It is strongly recommended that schools create a venue in which ASL 2a students can interact with each other and practice their newly acquired skills.

COURSE CODE: EDL257

American Sign Language 3a: Community & Culture

Required Materials

- Video recording device
- Pencil or pen
- Scanner or camera to digitize map
- Materials to create a promotional tool (can be created and then a picture of the tool can be uploaded—poster, markers, glue, etc.)

Software

- Word processing software
- Materials to create a promotional tool (can be digital—video, slideshow, etc.)

Other

- Friend(s), family member(s), or conversation partner(s) for demonstration purposes
- Community member from another country for conversation

Note: It is strongly recommended that schools create a venue in which ASL 2a students can interact with each other and practice their newly acquired skills.

COURSE CODE: EDL258

American Sign Language 3b: Conversations & Culture

Required Materials

- Cell phone, tablet, or computer camera with video recording abilities

Software

- Word processing program (Word or Google Docs)
- Graphic design tool (like Canva)
- Slideshow program (Powerpoint or Google Slides)

- Spreadsheet software (Excel or Google Sheets)

Other

- Access/transportation to a Deaf event
- Proof of event attendance (photo, signed letter, etc.)
- Conversation partner
- Community members or community program with which to volunteer or help

Note: Students in ASL 3a and 3b will need to practice their conversational ASL skills with a partner or group to advance their language skills to the intermediate level. For safety reasons, we ask that the teacher or school district locate another ASL student or member of the Deaf community who is willing to be a conversation partner in person or over video chat. If this conversation partner is not able to meet, the student will need the school district or teacher to locate an alternate conversation partner with whom to practice and complete assignments.

Students will also be asked to attend several Deaf events in the community. Alternate activities are provided for those students who are not able to find events in their areas or secure transportation.

- Water
- Wax paper or aluminum foil.
- White paper
- Writing utensil

Software

- Presentation software
- Word processing software

Optional

- Friend or family member
- Pretend Autoclave
- Pretend Bunsen burner
- Videoconferencing software

COURSE CODE: EDL362

Biotechnician 1b: Advancements in Biotechnology

Physical

- Audio recording device
- Digital camera
- Pencil and paper
- Scissors

Optional

- Pens
- Poster board

Software

- Presentation software
- Spreadsheet software
- Word processing software
- Graphic design software

COURSE CODE: EDL373

Biotechnician 2a: Moving into the Lab

Software

- Word processing software

Optional

- Art supplies
- Audio recording device
- Balloons
- Calculator
- Flasks with gas spigots (5)
- Glucose/sugar
- Graphic design software

- Heater
- Image editing software
- Litmus paper
- Presentation software
- Spreadsheet software
- Video recording device
- Water
- Writing supplies
- Yeast

COURSE CODE: EDL374

Biotechnician 2b: The Future of Biotechnology

Software

- Word processing software
- Presentation software

Optional

- Graphic design software
- Audio recording device
- Art supplies

- Writing supplies
- Poster board
- Spreadsheet software
- Video recording device
- Projector

COURSE CODE: EDL397

Scratch 3.0 Preview

- We are accessing Scratch 3.0 Preview Version in this course. Here are the minimum requirements from the Scratch 3.0 FAQ page (<https://scratch.mit.edu/preview-faq>):
- Scratch 3.0 is built on industry-standard HTML5 technology and is no longer dependent on Flash. Because of this, it runs in any modern web browser.

Desktop

- Chrome (63+)
- Edge (15+)
- Firefox (57+)
- Safari (11+)

Tablet

- Mobile Chrome (62+)
- Mobile Safari (11+)

Please Note: In this course, students will be designing their games in Scratch. The current version of Scratch 2.0 is Flash-based, but a new version is coming out later this year. Scratch offers a preview mode of their 3.0 version. We have tailored our instructions toward the Scratch 3.0 preview mode, found here: <https://preview.scratch.mit.edu/>. We will update our instructions once Scratch 3.0 is officially launched.

Frequently Asked Questions

Will Scratch 3.0 work on tablets and phones?

- Scratch 3.0 will work on desktop, laptop, and tablet devices (iOS 11+ and Android 6+). On tablets, there won't be a way to use "key pressed" blocks or right-click context menus until next year. You will be able to view projects on mobile phones, but you won't be able to create or edit projects on phones.

Will Internet Explorer be supported?

- No. We encourage Scratch 2.0 users using Internet Explorer to upgrade their browsers in advance of the Scratch 3.0 official launch.

What is WebGL and why do I need it to run Scratch 3.0?

- WebGL is a browser technology that is used by Scratch 3.0 to render projects to the stage. While WebGL is supported in all modern browsers, some older computers and operating systems can not support it. For users that can not run WebGL we recommend using the Scratch 2.0 Offline Editor.
